-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Drawings

3. Figures 1 and 12 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

4. **Claim 2** is objected to because of the following informalities:
On claim 2, line 4, "to be rotatable" should be changed to – to be rotated --.
Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. ***Claims 3 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Sheng (Patent No. US 6,801,343 B1).***

Referring to claim 3, Sheng shows in Fig. 3 an image reading apparatus of a contact image sensor for reading a light transmitting original (13a) by moving a contact image sensor unit (2) on a guide rail (7a), wherein a distance from an original surface of the light transmitting original to the contact image sensor unit is adjusted by providing a lifting mechanism (4) between said guide rail and the contact image sensor unit and, thus, a resolution is held.

Referring to claim 5, Sheng discloses that the distance from the original surface of said light transmitting original to the contact image sensor unit is stepwise adjusted.

Allowable Subject Matter

7. Claims 1-2 are allowed.
8. The following is an examiner's statement of reasons for allowance:

Claims 1-2 are allowable because the prior art fails to disclose or make obvious, either singly or in combination, an image reading apparatus comprising, in addition to the other recited features of the claim, "a distance from an original surface of the light transmitting original to the contact image sensor unit is adjusted by changing a position of a surface of the guide rail on which the contact image sensor unit moves and, thus, a resolution is held".

9. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. The following is a statement of reasons for the indication of allowable subject matter:

Claim 4 is allowable because the prior art fails to disclose or make obvious, either singly or in combination, an image reading apparatus comprising, in addition to the other recited features of the claim, "said lifting mechanism is a jack mechanism".
